PROFILE

A highly motivated and skilled engineering graduate seeking an entry-level position in software development, with expertise in Java, SQL, and Web technologies. Capable of learning new technologies and software quickly. Understanding customer demands and having strong communication skills.

SKILLS

Java | JavaScript | SQL | HTML/CSS
Bootstrap | React | Hibernate | Springboot
JDBC | Servlet | JSP | Git Bash | GitHub

TOOLS

Eclipse Enterprise IDE | MySQL Workbench
Visual Studio Code | Postman

CERTIFICATES

- Learn React Course, Codecademy
- Learn Java Course, Codecademy ✓
- Learn JavaScript Course, Codecademy ✓
- Learn JavaScript Unit Testing, Codecademy ✓
- Learn HTML Course, Codecademy ✓
- Learn CSS Course, Codecademy ✓
- Learn Bootstrap Course, Codecademy ✓
- Learn Git & GitHub Course, Codecademy ✓
- Learn Bash Scripting Course, Codecademy ✓

EDUCATION

Bachelor in Mechanical Engineering,
A. P. Shah Institute of technology
2021 | Thane, India

Diploma in Mechanical Engineering,
Yadavrao Tasgoankar Polytechnic
2018 | Karjat, India

SSC, Sacred Heart High School
2014 | Mumbai, India

PROJECTS

Personal Portfolio, React ✓

- Created a responsive web application using React that highlights my proficiency in utilizing React components, hooks, and state management to build a dynamic and intuitive user interface.
- Implemented features such as a contact form, which was integrated with emailjs for seamless communication with users.
- Also used Tailwind CSS for efficient and responsive styling

Image Manipulation, Core Java ✓

- Developed an image manipulation application using Java that enables users to modify images in various ways.
- Implemented various image manipulation methods using 2D arrays, including trimming borders, inverting colours, and applying colour filters.
- Demonstrated creativity, problem-solving skills, and proficiency in Java programming by combining technical knowledge with artistic expression to create an application that provides users with a unique and visually appealing experience.

Vehicle Management System, Core Java, Eclipse Developer IDE

- The project was built using Java OOPs concepts such as Encapsulation, Polymorphism, Inheritance and Abstraction.
- Additionally, features like MethodOverloading, MethodOverriding and the use of toString methods were also implemented.
- Furthermore, a login Interface was developed to allow users to access all relevant details of different vehicles.

Register-Login Page,

Java, Servlet, JSP, JDBC, HTML, Eclipse Enterprise IDE

- The main goal of this project is to develop a system for User Registration, Login Verification and Password Validation.
- The system will allow users to register using their personal information and then login with the correct credentials.
- In case the password entered by the user matches the existing records in the database, they will be directed to the welcome page otherwise they will remain on the login page.

PROFESSIONAL TRAINING

Full Stack Java Development Cohort, Tata Strive

Java Development, Jspiders

DECLARATION

I hereby declare that all the information provided above are true and would be responsible for any untoward discrepancy
